

ENHANCE your
PLEASURE
and Maintain Constantly

Water King Booster

Today the pioneering spirit of Pluga thrives with continuing investment in the highest quality products & technologies in the pumping industry. Our expanded range of reliable energy efficient and cost effective water pumps deliver world-class performance to meet enhanced needs in India and neighboring regions.

Operates in accordance with water demand

Maintains system pressure all the time

Saves energy by shutting the pumps when there is no usage

Offered in various pump configurations

Water King Booster

Features & Specifications

1. Designed for higher efficiencies with wide operating range
2. Maximum working pressure 4 bar
3. Available with 24L (inline) pressure tanks / Gauge and switch (Low Noise)
4. Withstand wide voltage fluctuation (170-240V)
5. Compact, robust and easy to handle
6. Suitable to operate in ambient water temperature
7. Self-priming upto 8 meters (at mean sea level)
8. Fitted with thermal overload protector (TOP)
9. 1.2 meter cable available with 16A plug

Applications

1. Domestic, Building & construction
2. Residential bungalows, Hotels
3. Hospital, Clubs, Villas, Guest houses
4. Gardens & Fountains
5. Sprinklers- Drip irrigation
6. Water distribution / Pressure boosting
7. Water circulation systems for terrace & ground installation
